COLD FORMED Steel Buildings:

An opportunity for you to be involved in an economical, creative, sustainable, versatile way to build your dream building.
Want to be involved in something that's built to support your vision? Let's discover why a COLD FORMED steel building could be the right solution for your lifestyle.

Create, Customize, Control

COLD FORMED steel buildings and customization go hand in hand.
We want to hear your vision, or assist in creating one, and help build it into reality.

Whether your building is designed for function, architectural brilliance, daily usage, or a combination of the three, you are in control of how involved you want to be throughout the process, right down to the last bolt.

Why COLD FORMED steel buildings?

- No welding required - COLD FORMED buildings are built with bolts or screws
- Great strength-to-weight ratio - Despite the lesser amount of material required, these buildings can support larger loads with less bulk
- Durable and resistant to: Fire, Wind, Flooding/Water Damage, Termites and Mold
- Low maintenance - Less maintenance than wood or shingle builds
- Fast construction time - Due to its simplicity, and lower builder skill threshold
- Cost effective - Saves time, foundation costs, fewer materials saves freight, less construction costs, saves insurance and more!
