Barndominiums

COLD FORMED steel barndominiums combine flexibility, durability and comfort, all offering a modern alternative to traditional homes. Create your dream home with a COLD FORMED Barndominium.

Why build a residential COLD FORMED Barndominium?

- **Customizable**, barndominiums don't have to be boring steel buildings. They are made for everyday comfort as well as reliability. You have the power to fully customize your layout and design, this includes color, two story, overhangs, windows/doors, shape and more! These are built to fit your lifestyle and reflect your vision.
- **Durable**, everyday use is backed with high structural integrity, these buildings are able to endure fire, wind, water damage, termites, mold and more. They will protect you, your family and what's important to you.
- **Reliable**, with a longer lifespan than both wood or tube-frame buildings and low maintenance compared to wood-frame or shingle, that means less unexpected repairs, less worry and more living.
- **Cost-Effective**, these buildings will save you in the long term with 40% faster build times, reduced maintenance and COLD FORMED steel's durability encouraging cheaper insurance. They also have a longer lifespan than traditional wood-framed buildings.
